Figure 2a - Protocol Flow

	·	·
[6] Services		Service A
[5] ANSU		Notification Of Service A
[4] Administration Unit	Tracks access to the network, may block or allow access	Optional notification
[3] Network	Network A accessed	Network A
[2] Wireless Method	Method A	Method A
[1] Wireless Stations	Wireless unit accesses network via wireless method A and communicates with Administration unit if required	Wireless unit accesses service A, ANSU is notified of services requested
